# SONUS - 1<sup>XT</sup>

The World's First DAB Radio with Voice Feedback

SONUS-1<sup>XT</sup> is the world's first DAB digital radio with iVOX™ voice feedback technology, bringing new levels of accessibility to radio listening. Based on EVOKE-1, the world's best-selling DAB radio, SONUS-1<sup>XT</sup> maintains the original's classic looks, but adds voice feedback, smoother lines, a clear graphical display, even better audio quality and alarm clock functions.

Tap the unique SnoozeHandle™ once to hear the time in clear, human tones (no robots here!). Tap it twice to have your alarm settings confirmed. An adjustable sleep timer lets you go to sleep to relaxing music or chat, and the independent alarms can wake you to a completely different station or a tone if you prefer.

With voice prompts, clear instructions, automatic volume equalisation, a CD-based audio user guide, and dedicated UK-based support team, SONUS-1<sup>XT</sup> is the easiest radio you will ever own.

Alternative voices are available from our website at [www.pure.com](http://www.pure.com).

## iVOX Technology

Uses recorded speech to provide selectable voice feedback for anything from the time, to your alarm settings to the full set-up of the radio – it can even spell out DAB scrolling text. And it's easy to adjust the amount of voice feedback using the dedicated iVOX button.

## Unique Bedside Features

Enhanced touch-sensitive SnoozeHandle tells you the time, tells you your alarm settings, snoozes the alarm and lights the display at night to see the time.

## VET

Volume Equalisation Technology automatically adjusts volume levels when you change stations so you don't have to.

iVOX™ makes radio accessible to everyone all the time. Using iVOX technology SONUS-1<sup>XT</sup> tells you station names, tells you the time, and tells you your alarm settings. It can even talk you through setting alarms or presets. All in real human tones. And all under your complete control. Just turn off what you don't need using the easy-to-change iVOX settings.

Woken up but don't want to open your eyes? Just tap the SnoozeHandle™ and SONUS-1<sup>XT</sup> will tell you the time.

Want to check your alarm settings? Simply tap the SnoozeHandle twice and they'll be spoken to you.

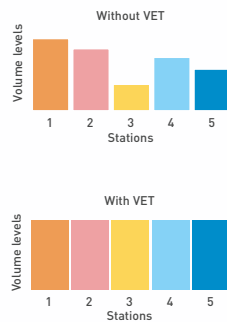

Can't find your glasses? SONUS-1<sup>XT</sup> will name the stations as you scroll through them, and even talk you through all aspects of setting up the radio.

Ever been frustrated when changing from a talk station to a music station, because you always have to adjust the volume? No more.

Volume Equalisation Technology (VET™) means that your SONUS-1<sup>XT</sup> constantly monitors the audio levels of every station and subtly adjusts their relative volume levels over time. So once you've found the volume setting you like you can switch between stations without changing the volume.

## FEATURES

- Easy-to-read full-screen graphical display.
- Two independent alarms mean you can have different alarms for you and your partner; different alarm settings for weekdays or weekends, or set a backup alarm just in case you sleep through the first. Alarms can be set to different stations or to a simple alarm tone.
- Touch-sensitive SnoozeHandle™ snoozes the alarm and indicates time and alarm settings with one or two taps.
- Sleep button switches SONUS-1<sup>XT</sup> off automatically after 15, 30, 45, 60 or 90 minutes. Set the alarm as well and you can fall asleep to one station and wake up to another.
- Clock is automatically updated from the broadcast DAB time signal, so you don't have to set it or worry about resetting it when the clocks go forward or back.
- Nine record timers allow you to record your favourite radio shows to a separate recording device\*.
- USB connector enables you to keep your SONUS-1<sup>XT</sup> up to date by downloading software upgrades from an internet-connected PC.

\* For timed recording you'll need a recorder with an optical input that supports sync-record, such as a MiniDisc or CD-R recorder, or a recorder with a timer of its own.
